New Japanese Reseller for ONELAN

July 2009..... ONELAN have signed up a new distributor, Peercom in Japan to increase their coverage in this region.

PeerCom, Inc. is a private company established in 2003 in Tokyo to sell computer and communication field products by importing advanced products from overseas.

Due to the recent rapid demand for digital signage in Japan, Peercom needed a simple to use solution with a Japanese interface to exploit this opportunity, and the ONELAN Net-Top-Box fitted the bill.

ONELAN was founded in 1988 and has been developing Digital Signage products since 2001. It has developed leading edge hardware appliances and software products that deliver ease of use, manageability, network security and scalability to the world of Digital Signage.

The company's Net Top Box devices are used as standalone appliances and in dynamic digital media networks within retail, education, industry, government and hospitality. ONELAN's NTBs are now installed in a variety of organisations including such well-known corporates as Airbus, ING Bank, Vodafone, Virgin Holidays and PricewaterhouseCoopers.

ONELAN Ltd is based in Henley-on-Thames, Oxfordshire.
