

ONELAN's Digital Signage Manager

August 2009....ONELAN Digital Signage is pleased to announce the Digital Signage Manager (DSM), an Enterprise class solution for Digital Signage networks.

The DSM has been developed with the needs of larger retail and advertising client networks in mind and existing partners already providing SaaS using ONELAN web based Net-Top-Box (NTB) systems.

Historically known for smaller networks ONELAN actually now have a number of retail and advertising led networks based on the robustness of its Linux based player. The release of the DSM gives these clients the tools they need to manage their networks and takes ONELAN into new territory as far as competing for larger projects. Free use of the basic live reporting features is available on a ONELAN hosted DSM for all new and existing clients up to 9 NTBs from NTB V7.2.

The DSM is scalable and has been tested on networks of up to 1000 ONELAN NTBs.

Other key features include multi-client operation with individual login credentials and the ability to view the live status including NTB output thumbnails for individual NTBs or for NTB folders. NTBs operate in dial-out mode for easy monitoring behind firewalls, and NTB Publish and Subscribe operations can be viewed at a glance.

To ensure a NTB network is working smoothly, the live operational and environmental health of the network can be reported on with regular status reports and email alerts when alarms are raised or lowered.

PRESS RELEASE

ONELAN was founded in 1988 and has been developing Digital Signage products since 2001. It has developed leading edge hardware appliances and software products that deliver ease of use, manageability, network security and scalability to the world of Digital Signage.

The company's Net Top Box devices are used as standalone appliances and in dynamic digital media networks within retail, education, industry, government and hospitality. ONELAN's NTBs are now installed in a variety of organisations including such well-known corporates as Airbus, ING Bank, Vodafone, Virgin Holidays and PricewaterhouseCoopers.

ONELAN Ltd is based in Henley-on-Thames, Oxfordshire.
